

Syngrafii

Working with Syngrafii to allow **remote signature of documents**

Aryza has teamed up with Syngrafii to provide a powerful tool to our customers using Aryza Insolvency (Case Management System – CMS). It is simple to turn this function on for you in your CMS and Microsoft Outlook, with no upfront costs. Simply pay on a case-by-case basis when you need to get a document signed.

Syngrafii is purpose-built to meet the legal, compliance and governance requirements within the Insolvency sector. It offers the most secure digital signatures available in the industry today through its proprietary iinked platform application.

Contact us today to get this added to your Case Management System.

Benefits of Syngrafii:

-  Your documents can be signed remotely, without compromising legal obligations or compliance requirements.
-  The only remote virtual signatory tool that is fully compliant with remote swearing, commissioning, and notarising.
-  You can witness your clients sign documents in a recordable & secure Video Signing Room.
-  Signatory workflows so your documents are signed in the required order.
-  Biometric protection of a secure one-time “wet signature”.
-  Securely share bulk documents internally & externally via email or SMS with 2 way authentication.
-  Full audit trail, including date, time, location, and IP address stamps of when & where the document was signed.
-  Your customers can easily provide any required proof of ID.
-  Web based portal for easy access for all parties involved.
-  No server or hardware costs.
