

# Cashflows

## Working with Cashflows to give our customers **the ability to take payments and to build payment plans**

Combining best-in-class technology, innovation, and expertise, Cashflows maximises payment success for businesses around the world.

**Contact us today to get this functionality added to your Case Management System.**

### Benefits of Cashflows:

Integration for a better payments experience - Cashflows' payment functionality is fully integrated within Aryza's CMS platform, allowing you to improve your collection success and assign to your IVA cases without having to switch between screens.

Quicker access to your cash - standard payment settlements allow you to track payments from start to finish and are made in three to five days. Cashflows can help you speed up this process, offering options that allow settlements within two days, one day and even on the same day.\*

Data to increase payments success - all new cards and CVV numbers are automatically verified. This provides useful raw decline data and transaction insights that can help optimise the payments process. Giving you the ability to quickly make informed approve or decline decisions within the platform.

Quick and easy switching - with Cashflows, new applications via Aryza that use our payment processing functionality are normally approved within two days - although sometimes it can be as little as 10 minutes.

Recurring billing & Cashflows account updater - manage collections effectively and minimise back-office hassle by setting up recurring card payments. Missed payments are minimised by automatically updating all lost, stolen, renewed and expired cards a few days before the billing date. Making sure no time or money is lost chasing customers for their details.

Unrivalled knowledge of PSD2, PCI DSS and SCA (Strong Customer Authentication) - an expert in payments regulation, Cashflows helps you navigate today's complex financial compliance requirements. We'll take care of the time-consuming legal stuff, allowing you to focus on growing your business.

\* Flexible settlement options come at an additional cost

Aryza will match the cost of your existing payments provider - and deliver all of the above features.
